Summary

I am a data-driven MCA graduate in AIML with strong skills in data science, machine learning, and deep learning. Proficient in Python, SQL, TensorFlow, and OpenCV, I have hands-on experience in data analysis, predictive modeling, and AI-driven applications. Skilled in data visualization and statistical analysis, I excel at transforming raw data into actionable insights. Passionate about solving complex problems and developing intelligent solutions to drive business impact.

Skills

Languages & Frameworks: Python, JavaScript, Java, SQL, HTML, CSS, Spring Boot

Frontend: React, HTML, CSS, JavaScript

Backend: Node.js, Express.js, Spring Boot

Database: MongoDB, SQL, PostgreSQL (basic)

AI & ML Tools: TensorFlow, Keras, OpenCV, Scikit-learn, CNNs, OpenAI API,NLP,LLM

Data Tools: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau,EDA

Other Tools: Git, GitHub, Agile, Stripe API

Experience

Analytical Career Connect

Intern

Remote

01/2025 – Present

Key Responsibilities:

- Conducted advanced data analysis using tools such as Python (Pandas, Matplotlib, Seaborn), SQL (SQLite), and Power BI to find trends.
- made interactive dashboards and automated visual reports for supply chain performance and delivery tracking using DAX and BI.
- Performed segmentation, correlation, and trend analysis to help stakeholders identify underperforming vendors, logistics gaps, and top-performing products.
- Wrote clear documentation, presented insights to mentors and teams, and recommended optimizations that improved delivery planning by highlighting late shipments (54%).

Projects

Image Detection System

A project aimed at creating an intelligent system for visual recognition in agriculture.

- Developed a deep learning-based image detection system to classify fruits and vegetables with high accuracy.
- Implemented Convolutional Neural Networks (CNNs) to classify over 20 types of fruits and vegetables.

Supply Chain Analytics

An analytical solution to improve supply chain operations by visualizing key business metrics using real-world data.

- Developed a comprehensive dashboard to track total revenue, delivery performance, shipping efficiency, and product profitability.
- Used advanced Python preprocessing and DAX in Power BI to identify that 54% of deliveries were late, optimize logistics, and uncover top revenue cities.
- Engineered features like Total Revenue, Profit Margin (%), and Delivery Gap to derive insights from 180K+ records.

OpenAI Financial Assistant

- Created a Python-based chatbot using OpenAI API.
- Provides simple financial advice and budget planning tips.
- Highlights readiness to work with AI in fintech.

Education

Chandigarh University

Master of Computer Application in AI and ML (MCA aiml)

India

08/2023 - 08/2025

VGC HPU

Bachelor of Computer Applications

India

07/2020 - 07/2023

CERTIFICATION

Python 3 Programming coursera	Python Basics, Python Functions, Dictionaries Data Collection and Processing,Classes and Inheritance, Python Project: pillow, tesseract, opencv
web development Bootcamp	HTML and CSS Basics, JavaScript Fundamental, React, node js, Mongo db, git ,SQL
java 17 udemy	Java Programming Basics, Error Handling and Debugging, DSA,JDBC, Spring Boot
