# SHIVANSH THAKUR

**AI Engineer | Document AI, Computer Vision & LLM Applications**

+91 70182 13168 | shivanshthakur1708@gmail.com
linkedin.com/in/shivansh-thakur1708 | github.com/shivu0070 | Portfolio

## PROFILE

AI engineer building prototypes for document extraction, computer vision and local LLM workflows. Experience spans model integration, structured outputs, retrieval, FastAPI services and evaluation on constrained hardware. MCA in AI & Machine Learning.

## EXPERIENCE

**Jr. Data Scientist, AI Engineering** Dec 2025 - Present

Harij Softech Solutions Pvt. Ltd. | On-site, India

- Built an invoice-to-JSON pipeline with **LightOnOCR-2 + llama3.2**, replacing a 51-function layout-repair pipeline. Recorded **93.9% strict cell accuracy (398/424 cells, 16 tuning pages)**; ran staged model inference on a **4 GB GPU**.
- Developed an offline medical-PDF splitter using **Qwen2.5-VL-7B**; internal evaluation recorded **97.2% correct page routing across 281 pages in 18 documents**.
- Built an **ALPR pipeline** combining YOLOv8, SORT tracking and PaddleOCR with character voting. The custom plate-detector training run recorded **97.5% precision and 98.7% mAP@50**.
- Built a local **HR-policy RAG assistant** using Ollama and FAISS, with source-grounded answers and an ask-HR fallback for questions the system could not resolve.
- Developed **ConsultOpen prototypes**: an LLM resume scorer using a 100-point rubric, plus **FastAPI + PostgreSQL** services for therapist and exercise recommendations from mood check-ins.

**Data Scientist Intern** Six-month internship

Analytics Career Connect | Remote

- Analysed **180K+ orders** in the public DataCo Supply Chain dataset using Python, SQLite and Power BI; identified late-delivery patterns by shipping mode and product category.
- Performed **RFM and CLTV analysis for 4,300+ customers** in the public UCI Online Retail dataset; built Power BI dashboards and cross-checked aggregates with SQL.

## SELECTED PROJECTS

**Autonomous Dev Team** | GitHub
Built a **Claude Code agent orchestration prototype** with planning, implementation and separate Playwright/vision evaluation. Three published showcase apps record **53/53 task-specific acceptance checks**.

**WhatsApp Intent Router** | GitHub
Fine-tuned a five-intent **DistilBERT** router for English and Hinglish messages. Redesigned an eight-intent taxonomy to resolve overlapping labels and applied class-weighted training.

**Local Voice AI** | GitHub
Built an appointment-booking voice assistant with **Whisper, Silero VAD, Ollama, Piper TTS and LiveKit**. Implemented streaming speech and interruption handling; recorded text-response timings across four local LLMs.

## TECHNICAL SKILLS

**AI / ML:** Python, PyTorch, Hugging Face Transformers, scikit-learn, DistilBERT
**Vision & Document AI:** YOLOv8, OpenCV, PaddleOCR, Tesseract, vision-language models
**LLM Applications:** Ollama, RAG, FAISS, structured JSON extraction, Whisper
**Backend & Data:** FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Docker, SQL, Pandas, Git, Linux

## EDUCATION

**MCA, AI & Machine Learning** | Chandigarh University | 2023 - 2025
**BCA** | Himachal Pradesh University | 2020 - 2023
